

BIOFLEX NATURAL TRACTION

Advantages of Bioflex Natural Traction over the traditional Ankle-Clamp machine...

■ Bioflex gives Fast Results.

While Ankle-Clamp machines give some decompression, they take up to five times longer than Bioflex to achieve full traction of the spine.

■ Bioflex Focuses on your Spine

Whereas hanging from an Ankle-Clamp machine puts traction on other joints as well. Ankles, knees, hips. That may not be desirable.

■ No Stress on Ankles with Bioflex

You hang from strong thigh muscles. Your body weight is not being supported by a small skeletal joint (ankle).

■ Good Blood Circulation with Bioflex

Your blood flow is not constricted as you would expect with harsh clamps around your ankles.

■ Bioflex is Comfortable

You rest against large High Density Cushion and Leg Rollers. Hang relaxed! In comfort!

With BIOFLEX, the traction is natural. There is no mechanical force. Your body simply uses the power of gravity!

Go for these results!

- * Relieve back pain significantly
- * Take pressure off compressed discs by gently decompressing your spine
- * Relieve pressure on nerves
- * Relieve sciatica
- * Help prevent degenerative arthritis
- * Relieve headaches and tension by releasing pressure on your neck muscles
- * Boost your metabolism by building up your large muscle groups
- * Slow down spinal shrinkage and resultant muscular pain
- * Reduce pain from herniated discs
- * Strengthen your entire torso
- * Strengthen your abs while supporting your back and pelvis
- * Stimulate circulation and waste removal in and around injured discs
- * Increase blood flow to the brain, eyes, skin and hair
- * Experience the rejuvenation of all tissues
